### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/EP2004/012723

Box	No. I	I Basis of the report	
1.		th regard to the language, this report is based on the international icated under this item.	al application in the language in which it was filed, unless otherwise
		This report is based on translations from the original language which is the language of a translation furnished for the purpo	e into the following language, ses of:
		international search (Rule 12.3 and 23.1(b))	
		publication of the international application (Rule 12.4)	
		international preliminary examination (Rule 55.2 and/or	r 55.3)
2.	rece		eport is based on (replacement sheets which have been furnished to the referred to in this report as "originally filed" and are not annexed to
		the international application as originally filed/furnished	
	$\overline{\boxtimes}$	the description:	
		pages 1-12	as originally filed/furnished
			received by this Authority on
			received by this Authority on
	$\boxtimes$	the claims:	
		nos.	
			as amended (together with any statement) under Article 19
			received by this Authority on
		nos.*	received by this Authority on
	M	the drawings:	
		sheets 1/2,2/2	as originally filed/furnished
		sheets*	received by this Authority on
		sheets*	received by this Authority on
		a sequence listing and/or any related table(s) – see Supplemen	ntal Box Relating to Sequence Listing.
3.		The amendments have resulted in the cancellation of:	
		the description, pages	
		the claims, nos.	
		41 - 4	
4.	$\Box$		nents annexed to this report and listed below had not been made, since
	ш	they have been considered to go beyond the disclosure as file	
		the description, pages	
		the claims, nos.	
		the drawings, sheets/figs	
		the sequence listing (specify):	
		any table(s) related to sequence listing (specify):	
*	If ite	tem 4 applies, some or all of those sheets may be marked "super	seded."

International application No.
PCT/EP2004/012723

Box No. V		Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

		September 2001 (2001-09-13)			
	2	INDEPENDENT CLAIM 1			
	2.1	As explained below, some of the features, namely			
		the phrase in italics under point 2.2, in claim 12	2		
		relate to a method of using the device and not to			
l					

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
	the definition of the device using its technical
	features. The intended limitations are therefore
	not clear from the claim (PCT Article 6) and were
	therefore not taken into account in the
	interpretation of claim 1.

- 2.2 The present application fails to meet the requirements of PCT Article 33(1) because the subject matter of claim 1 is not novel within the meaning of PCT Article 33(2).
  - D1 (the references in parentheses are to D1) discloses:

laser machining apparatus having a workpiece holder (36) for holding a workpiece (12), a first laser removing device (82) for laser drilling a workpiece using first operating parameters (see column 6, lines 30-34), and a second laser removing device (84) with which a workpiece can be machined using second operating parameters (see column 6, lines 35-39), which differ from the first operating parameters.

The second laser removing device (84) is designed for creating recesses by layer-bylayer removal of material, wherein the laser beam outlets (86, 88) of the two laser removing devices are rigidly offset relative to each other with respect to at least one, preferably two, axes, more preferably with respect to the two horizontal axes (x, y), and mechanical control elements

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

are provided by means of which the workpiece

are provided by means of which the workpiece can be moved translatorically with respect to a machine frame (see column 4, lines 27-29).

- 2.3 D2, D3, D4, D5 and D6 also disclose all the features of claim 1.
- 3 INDEPENDENT CLAIM 12
- 3.1 The present application fails to meet the requirements of PCT Article 33(1) because the subject matter of claim 12 does not involve an inventive step within the meaning of PCT Article 33(3).

D1 is considered to be the prior art closest to the subject matter of claim 12. D1 (the references in parentheses are to D1) discloses:

laser machining method in which a workpiece (12) is clamped and then machined by means of laser light, wherein, without reclamping, a first machining step of the laser boring process is carried out by means of a first laser removing device using first operating parameters (see column 6, lines 30-34) and a second machining step is carried out by means of a second laser removing device for machining the workpiece using second operating parameters (see column 6, lines 35-39), which differ from the first operating parameters (see column 6, lines 5-23);

#### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

the lasers of both laser removing devices are radiated from laser beam outlets (86, 88), which are rigidly offset relative to each other (only the galvo pairs (32, 28) are moved) with respect to at least one, preferably two, axes, more preferably, with respect to the two horizontal axes (x, y), and the workpiece can be moved translatorically with respect to a machine frame by means of mechanical control elements (see column 4, lines 27-29).

Thus the subject matter of claim 12 differs from the known method in that

"the second machining step is that of creating a recess by means of layer-by-layer removal of material".

These features, however, have already been used for the same purpose in a similar method (see D8, in particular column 4, lines 6-9 and 61-64). If a person skilled in the art wished to achieve the same aim in a device as per D1, this person could easily apply these features with like effect to the subject matter of D1. In this way a person skilled in the art would arrive at a method as per claim 12 without thereby being inventive.

4 DEPENDENT CLAIMS 2 TO 11 AND 13 TO 18

### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/EP2004/012723

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
	The dependent claims do not appear to contain any
	features which, in combination with the features
	of any claim to which they refer, meet the PCT
	requirements for novelty (claims 2 to 9) or
	inventive step (claims 10, 11 and 14 to 18).
